

VITABELLA ♀ VR 95-98 X ♂ Miriam

Vitabella is a tasteful, firm cooking oval ware potato which is highly suited for organic growing, mainly for the European market. The taste, the presentation and the storage characteristics of Vitabella are very good. Therefore this variety can be supplied almost year round. The variety is also suitable for making home French fries. The oval tubers have a good yellow to light yellow flesh color and a very nice presentation.

Basic properties

Dormancy	8
Maturity	7.5
Tuber shape	O
Uniformity of shape	7
Tuber size	7
Uniformity of size	7
Rel. tubercount	7
Shallowness of eyes	7
Color of skin	LY
Color of flesh	Y

French fries index	7

Segment

Special points of attention

- Light soils with a good structure and not too scab-sensitive are suited for Vitabella
- Vitabella is an early variety and requires a good fertilization. A splitted application of nitrogen is recommended.
- Vitabella can be harvested very quickly, because of its strong skin.
